

## Self-adjusting Stripping Pliers

- For stripping solid, stranded or finely stranded conductors with standard insulation
- For flat and round cables
- Integrated Side Cutter
- With opening spring and catch
- Adjustable stripping length
- Made of reinforced fibreglass plastic

SKU: 707-215

### Safety Notes

Use tools for indicated purposes only.  
Before using the cutting tools please wear body protection such as safety mask, safety glasses and hand protection.  
Beware of wire ends flying off!

## General Information

### Self-adjusting wire strippers

Self-adjusting wire strippers eliminate the annoying task of presetting and adjusting each wire gauge, and reduce to a minimum the risk of conductor damage thanks to automatic adjustment to the conductor cross-section. They are used for single-, multi- or fine-wire conductors with PVC insulation and for thin ribbon cables.

### Connecting to the future

Solar energy is a clean alternative source of electricity. To make sure it is also a safe source, junction box and switch cabinet wiring has to be properly stripped, crimped and connected up. Using NWS wire stripping and crimping tools, electricians can handle wires and cables in line with all the applicable regulations and down to the millimetre. In this way, whether private houses, factory roofs or photovoltaic installations, they all become clean and safe players in the transition to renewable energy sources.
