

Endress+Hauser Vibronic level switch FTL31-CA7M3AAWBJ

Vibronic point level switch for overflow prevention or pump protection in liquids.

Picture for reference only. Product appearance may vary based on configuration

The Liquiphant FTL31 is a vibronic point level switch for liquids. The device is used for overflow prevention or pump dry-run protection in cleaning systems. The measurement is not affected by conductivity, build-up, turbulence, flow or air bubbles and does not require calibration. The optional IO-Link capability allows easy and time-saving configuration.

- The FTL31 works in areas where other measuring principles are not suitable due to conductivity, build-up, turbulences, flow conditions or air bubbles
- Smallest vibronic sensor on the market

Configuration of FTL31-CA7M3AAWBJ:

Approval:	CA	CSA C/US General Purpose
Power Supply; Output:	7	DC-PNP, IO-Link; 4-wire
Electrical Connection:	M	Plug M12, IP65/67 NEMA Type 4X Encl.
Sensor Design:	3	Max. process temperature 150oC/302oF
Sensor Type:	AA	Compact version 316L Ra<3.2um/126uin
Process Connection:	WBJ	Thread ISO228 G1/2, 316L

Alternative part number: FTL31-8DJ1/0
