

Description High quality polyester fleece tape coated with a strong synthetic-based adhesive. This product is suitable for applications wherever noise reduction and abrasion resistance is necessary.

Application Preferably used for cable harnessing in the automotive industry.

Features

- Tearable by hand
- High abrasion resistance and noise reduction effect
- Very good adhesive properties
- Extremely soft surface
- Stable against rotting
- Flexible and easy to handle
- Free of critical substances

Technical Data

Material	Polyester Fleece	Test method
Colour	black	
Thickness (carrier)	0.3 mm	EN 1942
Core Ø	38 mm	
Adhesive base	acrylate-based adhesive	
Tensile strength	30 N / 10 mm	EN 14410
Adhesion to steel	2.0 N / 10 mm	
Elongation	10 %	EN 14410
Temperature resistance	-40°C up to +105°C	LV312
Storage life	24 month	
Recommended storage conditions	Relative humidity: 65% Room temperature: 23°C
