### BioCote Protected Finish

All painted components are protected with BioCote. BioCote is a new, patent-protected powder coating which inhibits the growth of potentially lethal bacteria and fungi. This reduces the risk of cross-contamination from surfaces with high contact frequency. Although this is no substitute for correct cleaning practices, the incorporation of BioCote into the manufacturing process provides users of our products with the peace of mind that every effort is being made to maintain a hygienic working environment.

### SEMA

Loading capacities are calculated in accordance with the relevant S.E.M.A Code of Practice for the design of structures. Products offer safe design, durability, strength and reliability, whatever the application.
