

- Protect Active equipment from dust

- Easy to remove using swing tab

- Available in packs of 100

Product Description

The RJ45 Dust Cap has been designed and manufactured by HellermannTyton to prevent foreign bodies such as dust, copper cable strands and cable insulation entering standard RJ45 jacks. Made from durable Elastomer material giving a reliable, secure grip of the socket.

The swing tab allows for operation in tight/compact spaces and assists with grip. Easy to plug; simply push the Dust Cap into an empty un-shuttered RJ45 socket. To unplug, push down the swing tab then pull on tab to remove.

Features and Benefits

- Protects unused ports on active equipment and patch panels in the data centre or comms room
- Fits all RJ45 ports including switches, servers, patch panels and other exposed outlets
- Easy to insert and remove where space is limited using innovative swing tab design
- Compact and low profile, ideal for data centre applications; blade servers etc.
- Soft flexible material ensures Dust Cover stays firmly in position
- Conforms to RoHS standards
- Colour: dark blue
