

BETA RSC50 2.0 P/2MDX-SX

Pair of right/left uprights for perforated tool wall systems, for workshop equipment

Features

The fixing system uses only 2 strategic points: one positioned behind the worktop and the other on the base of the module.

REINFORCEMENT

The uprights, made of high quality sheet metal, are the key element in reinforcing and enhancing the composition.

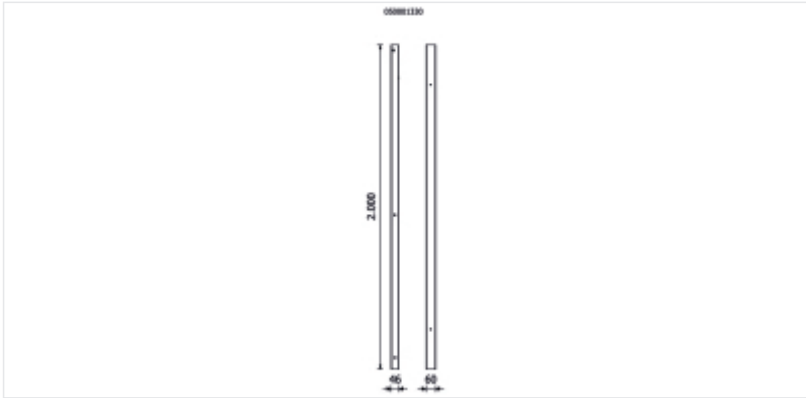

SIMPLICITY

Simplicity meets efficiency in the positioning of uprights: each module requires only one left-right pair.

DEPTH

Only 6 cm deep, for minimal protrusion.

Dimensions

Coded items
