

U 408**Sphered seat washers**

Sphered seat washers are used together with thrust ball bearings with sphered housing washers when the bearing is fitted into a machine component manufactured with a flat surface. The seat washers are supplied as separate components. Depending on bearing series, they have the basic designation U 2, U 3 or U 4 followed by a two-digit number, which identifies the size, e.g. sphered seat washer U 320 for bearing 53320.

- Enable the bearings to accommodate initial misalignment
- Can be used with single or double direction bearings
- Enable full interchangeability of seat washers

Product information

Dimensions

Bore diameter	65 mm
Outside diameter	95 mm
Height	12 mm

Logistics

EAN code	07316570744361
Pack code	12
Products per pack	1
Collecting pack quantity	5
Products per pallet	525
Pack gross weight	0.264 kg
Pack length	104 mm
Pack height	106 mm
Pack width	25 mm
Pack volume	0.276 dm ³
Product net weight	0.25 kg
eClass code	23-05-10-01
UNSPSC code	31171507

Properties

Material	Bearing steel
Coating	Without
Indicative product carbon footprint to manufacture	0.9 kg CO₂e
