

ECOSPILLFILTER SOCK HEAVY METAL REMOVAL

PRODUCT

The Ecospill Filter Sock helps control stormwater runoff by capturing pollutants in high-risk areas like storm drains, downspouts, and ditches. Its woven polymer casing allows fast water flow while the filtration media removes contaminants, including heavy metals (if equipped). With high UV resistance, it withstands prolonged sun and weather exposure, ensuring long-lasting performance.

PRODUCT NO	DIMENSIONS	QTY	CAPACITY
DUFSMET	2743.2mm (L) x 177.8mm (W) x 101.6mm (H)	1	N/A

ADDITIONAL INFORMATION

Durability:	UV-resistant and weatherproof design ensures long-lasting outdoor performance.
Weight:	20 kgs
Filtration:	Effectively captures pollutants like sediment and heavy metals to protect waterways.
