

Features

- High quality coating spring steel extractor tool Stainless steel main body covered with PVC insulated enclosure
- Suitable for removing and clamping various circuit board components.
- Small hook for easy extracting IC and installation.
- The length is about 105mm

RS PRO IC Extraction Tool

RS Stock No.: 0631075

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

RS PRO IC Extraction Tool

Introduce RS PRO IC extraction tool which is a simple and handy spring clip tool for easy extraction of integrated circuits, IC integrated circuit component chip extraction etc. The U-shaped design ensures a firm grip on the IC while minimizing the risk of bending or breaking its pins. Perfect for repair man, such as TV/DVD/PC technicians or IC workers.

Features and Benefits

- The U-shaped structure provides a secure grip and allows for even force distribution when extracting ICs, reducing the risk of damage.
- Lightweight and compact, making it easy to carry and store.

General Specifications

Soldering Accessory Type	IC Extraction Tool
For Use With	Removing and clamping various circuit board components
