

## Helagrip HG/LFHG

### Features

Helagrip is the ideal wire and cable identification solution. Our indelible printing technology and high grade PVC material ensures that Helagrip is the best expandable marker system available. Our special chevron cut ensures that the markers lock together and this, in conjunction with our specially designed profile, enables a wide range of cable sizes to be identified with a single marker. The standard PVC material is ideal for everyday use but if LFH requirements are needed, the LFHG range is approved to the highest specifications available.

### Applications

General Panel Building, Mass Transit, Telecommunications, Utilities.

Clearly a better way to identify in confined spaces.
