1000VOLTS
EN 60900
n°96016
n°96017

Special screwdrivers for combination pattern heads used on switchgear.

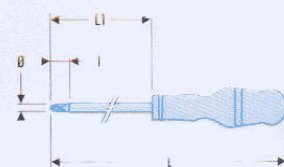

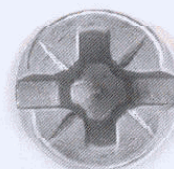

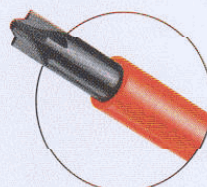

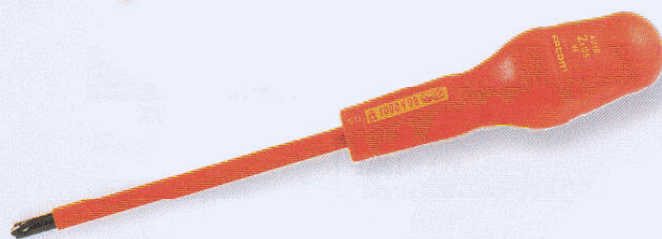

- **Special pattern**
 - Specific driver pattern suitable for switches, relays, circuit-breakers, boxes, terminals, etc.
- **Powerful tightening**
 - Torque transmission considerably higher than with a conventional screwdriver.
- **Drive integrity**
 - More positive coupling preventing slippage, reduced wear of both fastener and screwdriver.
 - More secure fit avoiding damage to enclosures and casings.
- **1000V safety**
 - Screwdrivers to European standard EN 60900.
- Most switchgear uses combination Pozidriv®/slotted heads (☰ ADYB), but some uses Phillips®/slotted heads (☷ APYB). For the best results, use only the correct screwdriver.

■ **ADYB Borneo Pozidriv® screwdrivers**

■ **APYB Borneo Phillips® screwdrivers**

- Designed for screws with combination heads used on electrical terminals.
- More powerful tightening enhances safety.
- Positive engagement reduces slippage and wear.
- Longer service life.
