

Art.-No. 520593

GTIN (EAN-Code): 4048962169386

fischer static mixer FIS UMR for fischer injection cartridges 585ml and 1500 ml

Top Features

- Ensures safe mixing of hardening agent and resin components during application.
- Use with extension tube possible, diameters 9 mm and 15 mm.
- With suitable screw connection for the cartridge.

The advantages / Product description

Static mixer for fischer injection cartridges in sizes 585 ml and 1500 ml. For safe mixing of the 2 components.

Advantages

- The fischer static mixers are ideally adapted to the fischer injection mortars.
- The static mixer provides for a homogeneous mixing of the mortar components and thus allows for a secure application of the fischer injection mortars.

The fischer static mixer FIS UMR is screwed onto 585 ml and 1500 ml fischer injection cartridges and ensures safe, homogeneous mixing of both mortar components during extrusion from the cartridge.

Application and approval

Applications

- Mixing and activation of the fischer injection mortar

Building materials

- All building materials in which injection mortars are used

You can find detailed information on building materials in the registration document.

Assembly instruction

Functionality

- When being injected, the two components of the injection mortar are squeezed through the static mixer and thus activated.
- The mixing spiral thereby ensures the homogeneous mixing of resin and hardener.
- Do not use static mixers without mixing spiral!

Technical data

Contents	10 x Static mixer FIS UMR for 585 ml cartridges and 1500 ml cartridges
Packaging	Polybag
Amount	10 pcs
GTIN (EAN-Code)	4048962169386
