

FEATURES

- Black liquid adhesive supplied in a 20 g bottle
- Medium viscosity glue
- Chemical composition of Ethyl 2-Cyanoacrylate
- Rubber toughened to resist impact, vibration and high stress
- Offers flexibility when bonding metals, fibreglass or rubber
- This glue can bond skin instantly and should be kept out of reach of children

RS PRO 20 g Super Glue

RS Stock No.: 908-2802

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

RS PRO's fast-acting super glue finds practical use in many environments and industries. For speedy fixes and immediate results, it instantly bonds almost anything, from glass and wood to plastic.

The medium-viscosity adhesive is rubber toughened and offers flexibility when bonding metals, fibreglass or rubber. It also offers excellent resistance to impact, vibration and high stress. Technically referred to as a cyanoacrylate adhesive, this super-strong glue is a type of resin that adheres virtually instantly when it comes into contact with moisture. As trace amounts of water are present on most surfaces, this black super glue can be used to join many materials.

General Specifications

Package Size	20g
Product Form	Liquid
Colour	Black
Package Type	Bottle
Base Chemical	Ethyl 2-Cyanoacrylate
Maximum Full Cure Time	<5
Low/No Odour	Yes
Odour	Sharp Characteristic Odour
Cure Time	<5
Special Features	Super Glue
Applications	Environments and industries

Mechanical Specifications

Viscosity	Medium
Specific Gravity	1.04
