Product Description

Transmit high-quality audio signals with this jack to two RCA plug cable assembly. It's typically used to connect portable devices such as laptops and mixing consoles with stereo receivers. The standard 3.5 mm male jack plug that can be plugged into compatible auxiliary inputs. The two RCA plug connections are for use with stereo audio applications. These are coloured red and black for the right and left channels respectively and are used to send the audio signal to the right and left audio channels. This cable assembly is sheathed in PVC for resistance to wear. It's suited to a wide range of private and commercial settings.
