

About Polyimide tape

◆Mutoh MF-1100 Polyimide Tape S

Tape S is a tape that is coated with adhesive to one side. The tape is attached to MF-1100 as standard accessory.

◆Mutoh MF-1100 Polyimide Tape W

Tape W is a tape that is coated with adhesive on both sides like double-faced tapes. It enhances adhesion between an object and a heater table. Tape W is designed to stick the object stronger than Tape S. However, it sometimes difficult to remove an object from a heater table because of strong adhesiveness.
