

Coroplast 7270
Double sided tape with acrylic adhesive

Application, properties and advantages:

- Thin double-sided tape with a non-woven paper carrier.
- Coated with acrylic dispersion adhesive.
- Preferably used indoors for the self-adhesive preparation of foams, signs, emblems, ledges and papers as well as to splice paper and film webs.

Technical data: 7270 (928)

Carrier:	Non-woven paper, 45µm
Adhesive:	Acrylic dispersion
Thickness:	0.10 mm
Liner:	Siliconised paper, honey
Adhesion to steel:	17 N/25mm
Temperature range:	-40 up to +80 °C

Coroplast 7280
Double sided tape with acrylic adhesive

Application, properties and advantages:

- Double-sided tape with a non-woven paper carrier.
- Coated with acrylic dispersion adhesive.
- Preferred used for the self-adhesive preparation of foams, signs, emblems, ledges and papers as well as to splice paper and film webs.
- Indoor applications.
- Very good ageing resistance.

Technical data: 7280

Carrier:	Non-woven paper, 48µm
Adhesive:	Acrylic dispersion
Thickness:	0.15 mm
Liner:	Siliconised paper, honey
Adhesion to steel:	38 N/25 mm
Temperature range:	-40 up to +80 °C
