AUDIO

**The well-proved diskette since several years, for highest quality requirements.**

**FD - 3,5" Floppy Disk**  
 The high density 3,5" MF2HD disk offers an unformatted capacity of 2,0 MB. In addition, the innovative materials and innovative design used

by Fujifilm guarantee unbeaten performance and service-life.

**Colored Disks**  
 More comfortable archiving with colours which optimise your organisation. Fujifilm 3,5" MF2HD disks are available in a range of colours.

**FC-lifter**  
 The FC (fixed contact) lifter ensures optimum contact between the non-woven fabric and the disk surface and thereby guarantees more and careful removal of dust.

**Non-woven fabric support via 2 ribs**  
 As a result, the contact surface is increased and the cleaning effect is improved. In addition, more effective long-term cleaning is achieved.

**Reliable magnetic data media**

- More than 30.000.000 passes even under different temperature conditions
- A special material for the disk's base layer improves resistance to contraction due to heat.

**Special non-woven fabric material**  
 As a result of this harmful effect of dust is therefore increased.

**Fit & Sealed (FS) shutter**  
 Wedge-shaped shutter: For improved protection against dirt dust particles. This unique design provides on extraordinarily narrow seat between the shutter and the housing.

Specifications of 3.5" Micro Floppy Disk (MF2HD)		
Basic Specifications	Magnetic Particle	BERIDOX Hyper HD
	Coerativity (Oe)	720 Oe (nominal)
	Recording Sides	Double Sided
	Recording Density	High Density
	Tracks/Disk	80 x 2
	Track Density (TPI)	135
	Recording Method	MFM
	Max. Recording Density (bpi)	17.4 K
	Memory Capacity Unformatted (Bytes)	2.0 M
	Transfer Rate (bits/sec.)	500 K
	Disk Rotation (rpm)	360/300
Dimension Specifications	Disk Diameter (mm)	85,8 ± 0,2
	Total Thickness of Disk (µm)	77 (nominal)
	Thickness of Coating (µm)	0.9 (nominal)
	Outer Dimension	90 x 94 x 3.3 mm

Specifications and appearance are subject to change without notice.
