## TSN 517 C

### Felt seal

Felt seals provide a simple and effective sealing solution. They accommodate relatively high shaft speeds, because a small gap forms between the felt and shaft, transforming the seal into a non-contact, gap-type seal. Felt seals do not limit axial movements of the shaft. When ordering, please note that one item (seal pack) contains two seals (four halves).

- Easy to install
- Cost-effective
- Suitable for relatively high shaft speeds

## Overview

### Dimensions

Outside diameter	103.5 mm
Shaft diameter	75 mm
Housing groove diameter	106 mm
Width	10 mm

### Properties

Accessory type	Housing seal
Sealing type	Felt
Material	Felt with aluminium and nitrile rubber elements

### Logistics

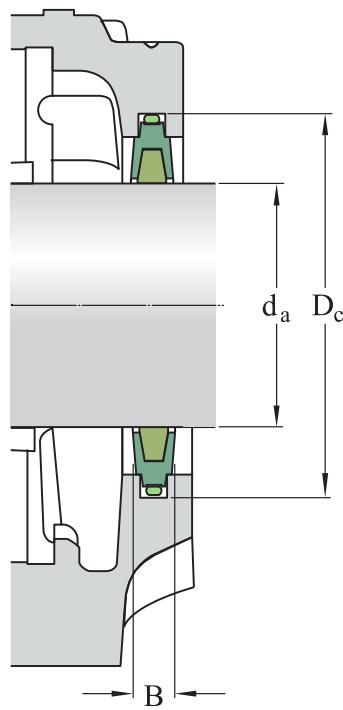

Product net weight	0.13 kg
eClass code	23-05-17-90
UNSPSC code	31171519

## Technical specification
