RS Pro Pen Oil For Multi-purpose

Specifications:

Package Type	Pen
Application	Multi-purpose

Warning

Flammable solvent

Product Details

Engineers Pens

Precision application pens designed for the service and repair engineer to apply small quantities of cleaners, oils and coatings or where application in confined areas is required. Ideal for spot cleaning, repair and service of communication equipment, electrical and electronic control equipment, office equipment etc. All available as packs of 5 12ml pens.

Clear protective coating: a conformal coating to protect PCBs against environment attack after repair.

Connector lubricant: a contact lubricant for micro-switches, relays, edge connectors, especially suitable for gold contacts, resists attack and suppresses arcing.

Mechanical oil: clear oil containing molybdenum and good mechanical lubrication. Resists drain when moving parts at rest.

Surface mount flux: a quick-drying, mildly activated (RMA type) no clean flux for removing components and making quick repairs.

Cleaning solvent: removes greases, oils, flux residues and conformal coatings, fast drying leaving a clean dry surface.
