

## Coax Stripper

- For gradual stripping of all common coaxial cables (e.g. aerials and transmission cables) and flexible cables such as 3 x 0.75 mm<sup>2</sup>, 10 mm<sup>2</sup> and 16 mm<sup>2</sup>
- The cutting depth does not need adjustment
- Made of reinforced fibreglass plastic

SKU: 714-SB

### General Information

#### Cable Knives and Cable Strippers

Cable knives are adjustable for cutting round the cable or along it. They are accurate and provide optimum safety for rapid stripping of all standard round cables. Stripping cables and wires has never been so easy! The cable strippers are self-adjusting, making them very easy – and also very fast – to use.

#### Connecting to the future

Solar energy is a clean alternative source of electricity. To make sure it is also a safe source, junction box and switch cabinet wiring has to be properly stripped, crimped and connected up. Using NWS wire stripping and crimping tools, electricians can handle wires and cables in line with all the applicable regulations and down to the millimetre. In this way, whether private houses, factory roofs or photovoltaic installations, they all become clean and safe players in the transition to renewable energy sources.
