

Pt100 Class B Sensors with PTFE Insulated Lead

Features

- These sensors are versatile and dependable, making them suitable for a range of scenarios where accurate temperature measurements are crucial
- 4 wire configurations
- The combination of Pt100 Class B accuracy and PTFE insulation ensures they can perform reliably even in demanding environments

Specification

Insulation Material	PTFE
Sensor Type	Pt100
Sheath Material	316SS
Probe Diameter	4 mm
Cable Length	1 m
Conductors	7
Conductor Cross-Section	0.16 mm ²
Cable Type	Insulated Twisted Lead
Temperature Range	-50 ... 200 °C
Cable Termination	Bare End
Standards Met	IEC 751
Accuracy	Class B

Art. Nr.
RND 410-00285
