

TECHNICAL DATA SHEET

DL-44 Degreaser Label-remover

Description

DL-44 is an efficient industrial cleaner which dissolves grease, oil, dirt, soot, printing ink, Indian ink, most non hardened adhesives and glue remnants.

DL-44 does not contain any corrosives, is gentle and pH-neutral, which makes it safe on both glass, metal, laminate, bricks, painted surfaces, rubber and wood.

After about 5 minutes the most normal-drying adhesives (non-hardened types) are neutralized and label- or glue remnants can be removed.

DL-44 contains ingredients meeting USDA K3.

Properties

- label remover
- efficient degreaser
- reliable and gentle
- pH-neutral
- based on citrus oil
- wide application area
- removes dirt, grease, oil etc.

Application

Apply DL-44 on the label or the subject, which has to be removed. Let it soak in a few minutes to ensure a complete penetration, so that the active citrus oils can neutralize the bond strength in the glue remnants.

Remove the applied subject and wipe the surface with a clean cloth/towel. If necessary rinse with water or wipe the surface with a moist cloth/towel.

Note! It is recommended always to make a test on small areas before use, as DL-44 can influence certain types of plastics and a few special lacquers.

TECHNICAL DATA SHEET

DL-44 Degreaser Label-remover

Technical and physical data

Partnumber	01175	26050
Packing	500 ml spray	50 ml spray
Contents	500 ml	50 ml
Weight	375 g	37 g
Propellant	CO ₂	
Base	citrus oil	
Appearance	clear/transparent	
pH	neutral	
Density	0,833 g/ccm	0,74 g/ccm
Odour	citrus	
Flashpoint	46°C	
Emptying rate	0,37 g/sec	0,76 g/sec
