

## Valve breather caps

### • Material

Polyamide based (PA) technopolymer. Resistant to solvents, oils, greases and other chemical agents.

- Cover: RAL 2004 orange, semi-matte finish, with graphic symbol "valve".

- Threaded connector: black colour, semi-matte finish.

### • Packing ring

NBR synthetic rubber.

### • Sealing disk

Technopolymer with NBR synthetic rubber O-ring.

### • Spring

Stainless steel.

### • Standard executions

- **SFV-10 mb**: valve (sealing disk) opens when pressure exceeds 0.010 bar (set at 10 mb).

- **SFV-100 mb**: valve (sealing disk) opens when pressure exceeds 0.100 bar (set at 100 mb).

### • Maximum continuous working temperature

100°C.

### Features and applications

SFV. valve breather caps are particularly suitable for all those applications (speed reducers, variators or compressors) when the internal air pressure must not exceed a certain value (10 or 100 mb).

In these cases, the safety valve of the cap allows the expulsion of the exceeding air in the reservoir, thus re-establishing the pressure values for which the valve is set.

Sealing disc (closed in normal pressure conditions) prevents dust from getting in and oil-losses.

### Special executions on request

Black cover.

Operating layout
