

# GlasLim

**Casco Glaslim is a UV-curing single component, high viscosity adhesive formulated for bonding glass to glass and glass to metal**

Casco Glaslim cures rapidly and gives a clear bond and is suited to applications requiring a tough cured polymer and a rapid bonding, typical usages include gluing glass ornaments, jewellery assembly, wine glasses, glass handles and bonding glass furniture and displays.

## Technical data

assembly time: 20 sek – 3 min dependin on sun light

Ready for use: Direct after bonded
