RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

This adjustable ESD steel shelf is made from minimum 1.0 mm thick sheet metal, ensuring durability and stability. With a standard depth of 300 mm and a load capacity of up to 20 kg, it provides a reliable surface for storing tools, materials, and components. The shelf features adjustable tilt, either stepped or smooth, allowing customization to suit individual workspace needs. Designed to mount on a perforated panel in a horizontal or angled position, it enhances workstation organization and ergonomics. Custom sizes and higher load capacities are available on request.

Accessories compatible with L & H Type workbenches
