Safety Surface Switches

Clipsal's safety range of switches ensures isolators are highly visible by using a brightly coloured red switch knob and yellow plate.

The high visibility naturally reduces an individual's response time in the event of an emergency.

Range consists of the following catalogue numbers at standard switch prices.

56 Series Surface Switches

56 Series Surface Switches are available from 250V, 10A to 500V 63A. They incorporate a positive, rotary switch action. 'ON' and 'OFF' positions are clearly marked and there is provision for two padlocks. Hole diameter is 8mm.

If locking is required in the 'ON' position, simply drill a hole where necessary.

All 63A switches come with the facility to fit auxiliary micro switch 56SWAUX15.
