

Features

- Cast steel body with machined bore and rotor
- Supplied with 2 Inch BSP adapter and suitable for use on 205 L drums
- Delivers approximately 0.2 L/revolution

RS PRO Steel Syphon Pump, 0.2L

RS Stock No.: 0783221

RS PRO is the own brand of RS. The RS PRO Seal of Approval is your assurance of professional quality, a guarantee that every part is rigorously tested, inspected, and audited against demanding standards. Making RS PRO the Smart Choice for our customers.

Product Description

RS PRO Steel Syphon 0.2 L Pump

This syphon pump is an ideal solution when you need to transfer liquids from one container to another without making any mess. It uses rotary motion to force the liquid through its cast-steel body.

The pump comes with a 2-inch adapter that enables you to connect it to outlet and inlet tubes easily. Suitable for large drums with a volume of 205 litres, its rotary pumping motion delivers around 0.2 litres per revolution, meaning you can quickly transfer large amounts of fluid without any hassle.

The syphon pump can effectively move oil, antifreeze, degreasers and other non-corrosive liquids, making it suitable for automotive use as well as demanding industrial applications. To make sure the product meets our stringent RS PRO standards for quality and safety, it's been stringently tested by engineers.

Features and Benefits:

- Rotary oil drum pump
- Body made of cast steel
- Adapter size of 2 inches
- Suitable for use with 205-litre drums
- Delivers approximately 0.2 litres per revolution
- Can move oils, antifreeze, degreasers and other non-corrosive fluids
