Product description

A breadboard is a solderless device for temporary prototypes with electronics and circuit design testing. Most electronic components in circuit designs can be connected by inserting their leads or terminals into the holes and then, if necessary, making connections with wires. Whether you're working on prototypes, experiments, or educational projects, this breadboard is the ultimate tool to unleash your electronic creativity.

This kit includes a breadboard with 830 contacts and 140 jumpers provided in a convenient storage box.

- + No soldering hassle: Say goodbye to soldering irons and tricky soldered connections. With this solderless breadboard, you can quickly and easily connect and modify components without any fuss.
- + Maximum flexibility: This breadboard offers 830 solderless contacts, providing ample space for even the most complex electronic projects.
- + High-quality materials: This breadboard is made of high-quality ABS and coated contacts for excellent conductivity. These jumpers are made of excellent copper-coated material with outstanding conductivity and transmission performance, easily reshaped for connection testing.
- + Safe usage: This breadboard is lead-free and compliant with RoHS standards, ensuring safe usage.
- + Arduino compatibility: Specially designed to seamlessly work with Arduino, this breadboard makes it easier than ever to realize and experiment with your Arduino projects.

Specifications

Physical properties

Primary colours	Grey
Additional colours	Black,Blue,Green,Red,Yellow
Depth unit	56.5 mm
Width unit	170 mm
Weight unit	150 g
Material	ABS
Depth breadboard	56.5 mm
Width breadboard	165.5 mm

Electrical Properties

Maximum current rating	3 A
Maximum voltage rating pcbs	30 V

Performance & Technical Specs

14-pins IC capacity	9
Board type	Solderless
Number of base sockets	1
Number of binding posts	0
Number of bus strips	2
Number of tie points	830
Set contents	<ul style="list-style-type: none"> • breadboard • jumperwires • clips
Number of pieces	1
