

Endress+Hauser Transmitter CM42-MEA100EAD00

Transmitter for safe measurement in all process applications – even in hazardous areas. Integrate it seamlessly into your PCS and benefit from simple and fast operation and maintenance.

Picture for reference only. Product appearance may vary based on configuration

The Liquiline M CM42 is a versatile transmitter that ensures safe measurement across all process applications, including hazardous areas. It seamlessly integrates into your process control system, offering simplicity and speed in operation and maintenance. This product is designed to provide reliable and efficient process control.

Configuration of CM42-MEA100EAD00:

Sensor Input:	M	Digital, Memosens pH, (glass) ORP
Approval:	E	ATEX II (1)2G Ex ib (ia Ga) IIC T4/T6 G
Certificate:	A	not selected
Output:	1	2x4-20mA, 1xHART
Housing:	0	Plastics (PC)
Cable Entry:	0	Gland M20x1,5
Software:	EA	Basic version
Language Instrument: Documentation:	D	German + English; German
Documentation:	0	Starting up + operation
Additional option:	0	Basic version

Alternative part number: CM42-MEA100EAD00
