

Datasheet

Fine Machine Point Punch, 100 mm

RS Stock number [547-638](#)

Description:

Centre punches available in four sizes each with a chemically blackened knurled grip and a round head. A fine machine ground point with a 60° chamfer, gives accurate centring on cross lines and makes well defined impression for drilling.

The round head provides a large face for striking and also prevents the punches from rolling when laid on a bench.
