RS Pro 25 ml Black Syringe Epoxy Adhesive for Metal

Product Details

Magnetite Loaded Epoxy Syringe

A rapid curing epoxy adhesive loaded with magnetite which bonds and gives mechanical strength and stability.

Supplied in a convenient twin syringe which measures out equal quantities of the viscous liquids

The epoxy gels within 5 mins. and reaches full strength in 24 hr (at 20°C) after mixing

Forms a strong bond to most metal surfaces, filling gaps and holes

May be machined, tapped, filed, etc

Instructions for use are printed on the syringe

Filled Epoxies

Versatile durable two-part epoxy compounds for maintenance and repair of a broad range of equipment. Cured repairs can be drilled, tapped, machined or painted which has long-life protection against abrasion, corrosion and chemicals.
