

## Safe-D 20mm Conduit Clip - Galvanised

Provides a 3mm stand off from the surface

Simply wrap around the conduit, perfect for tight spaces

Secure conduit with locking tab

Centralised base fixing, gives a neat appearance to installation

Safe-D Conduit Clips combine fire performance, quickest fix, and a modern look, to secure cables in 20mm outer diameter galvanised (or PVC) conduit installations... (or exposed 20mm o/d cables and pipes.)

Compared to traditional saddles, where lids must be secured to bases, there is no separate lid - the conduit (and cables) is held by the wrap-design, which has an end tab that simply fits through the opposing notch to enable a secure lock.

The tight wrap, that eliminates need for wide-bases, is ideal also for installations in tight spaces.

**1 piece for only 1 fixing!**

- Fully safety tested, for compliance with BS7671 and BS5839 part 1
- Produced from steel with >1200°C melting point
- Non-corrosive finish
- Unique single piece fixing, only 1x screw required
- Fixing hole is ideal for use with D-Fixings
- Also available in white or black finish

**In fire conditions, Conduit Clips can withstand 970°C for at least 2 hours, ensuring that cable installations will not collapse to cause potentially fatal entanglements.**
