

Logitech® Internet Keyboard

PC keyboard for fast Web navigation

Web browser control at your fingertips

The Logitech Internet keyboard puts all your favorite Web commands, applications, and sites right at your fingertips. This is a complete solution that provides all the functionality you want for entering text into your favorite

applications, controlling your computer, and making the most of your on-line time.

Enjoy faster browsing

Launch your browser, execute the most common browser commands, and even scroll with the touch of a button. The Logitech Internet keyboard gives you 17 buttons dedicated to faster, easier browser control. Best of all, there are no control keys to remember and no moving the cursor back and forth on the screen to slow you down.

Launch Web sites and applications quickly and easily

Use the twelve function keys to launch your favorite Web sites, files, and applications. It's simple to customize these keys with the included Key Commander™ software, and to change these assignments any time you choose. To instantly go to a site or launch an application, just hold down the Logitech key and press a function key.

Start typing right away

The convenient, standard 104-key layout means you can start typing immediately, without taking the time to learn unfamiliar character key positions. Type a few characters and you'll instantly appreciate the difference of our full-size keys with quiet, tactile key action.

"Hot-keys" make Windows® 95, 98, and NT® 4.0 even easier to use

Three Windows® 95 "hot-keys" let you instantly access the Start function and context menus from wherever you are in any document or application.

Detachable palm rest improves comfort

The included, detachable palm rest gives you new choices for comfort and flexibility, and adds a bit of color to your desktop. The gently curved pad is a convenient place to relax your hands during typing breaks, and it's easy to detach and move out of the way when you want extra desk space.

Logitech® Internet Keyboard

PC keyboard for fast Web navigation

Very easy to connect

Just plug this keyboard into your computer and start typing. It's a complete solution that includes an adaptor so you can instantly attach it to either an AT- or PS/2-style keyboard port.

Experience Logitech quality

This keyboard is made with the same uncompromising quality that Logitech, the world's largest mouse manufacturer, has been building into its input devices for more than a decade. The keys are rated for a lifetime of 20 million strokes.

Warranty

The Logitech Internet keyboard includes a three-year warranty (see details inside the box).
