Safety Barriers

Product Description

Safeguard your sensitive areas with RS PRO Protection Barriers. Made from steel and coated in a high-vis yellow and black finish to provide a high-impact safety barrier. The corner collision form design prevents contact with serviceable areas like control towers and equipment facilities. During application, they are floor mounted via the integrated base plates and fixings purchased separately. Once installed, safety barriers create permanent guard protection that can withstand substantial impacts from trolleys and forklifts.
