RS Stock No.: 124-6591

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

RS PRO Transparent Polypropylene Compartment Box, 60mm x 170mm x 130mm

Choose this compartment box from RS PRO when you need to pack up small components, from screws and dowels to washers and Allen keys. Thanks to its built-in handle, it can be used for both storing and transporting items.

Both the casing and lid on this box are transparent, so you can always see what's inside to easily find what you need. You can also use it to store or carry bigger tools, as it comes without dividers. The corners and handle of this container are made from durable polyvinyl chloride (PVC) to protect it from damage and ensure it keeps its shape. The locking lid keeps your items safe from dust and other particles.

This box is made from polypropylene (PP), meaning it's hardwearing as well as lightweight. It makes for a useful storage solution at home or in your workshop.
