

tesa® 6056

Semi-automatic bench dispenser

tesa® 6056 is a bench dispenser with pre-set length control and electromagnetic cross-cutter. It is universally applicable for nearly all kinds of tesa® self-adhesive tapes up to 50 mm width, particularly cloth and paper tapes. Even difficult to cut materials are cut perfectly. Due to the electromagnetic triggered transverse blade a smooth clean cut is achieved.

Main Application

The desired strip length is set on the measuring scale on the left-hand side of the dispenser in a range from 30 to 150 mm. The tesa® tape is unrolled by hand until the measuring roller prevents further tape to be dispensed. By pulling the tape gently downwards, the electromagnetic cross cutter is triggered via a microswitch. The desired strip is automatically cut for use. A single movement of the hand is, therefore, sufficient for unrolling, cutting and removing a tesa® strip of predetermined length. For strip longer than 150 mm, the measuring roller is switched to continuous operation. The tesa® automatic dispenser 6056 is equipped with a control unit to adjust the impact force of the electromagnetic cutter. Set a lower impact force for tapes which are easy to cut, such as filmic tapes of smaller widths, to minimize impact noise and dispenser strain.

Technical Data

▪ Type of tape	single-sided	▪ Max. roll diameter	180 mm
▪ Application purpose	multifunctional	▪ Core diameter	3 inch
▪ Length	340 mm	▪ Type of applicator	table
▪ Width	150 mm	▪ Max. roll width	50 mm
▪ Height	133 mm	▪ Length presetting up to	30-150 mm
▪ Mode of drive	automatic	▪ Connections	230 V / 50 Hz
▪ Weight	5500 g	▪ Power supply	10 watt
