Receptacles for Plugs and Attachment Plugs - Component

[Receptacles - Component] Receptacles for Plugs and Attachment Plugs - Component

See General Information for Receptacles - Component

The devices covered under this category are incomplete in certain constructional features or restricted in performance capabilities and are intended for use as components of complete equipment submitted for investigation rather than for direct separate installation in the field. THE FINAL ACCEPTANCE OF THE COMPONENT IS DEPENDENT UPON ITS INSTALLATION AND USE IN COMPLETE EQUIPMENT SUBMITTED TO UNDERWRITERS LABORATORIES INC.

GENERAL

This category covers the following types of products:

Appliance, Equipment or Fixture Outlet — A female contact device for mounting on utilization equipment.

Receptacle — A female contact device intended to be installed in assemblies intended for use on a wiring system to supply current to utilization equipment.

This category may also cover the following types of products of a nonstandard configuration blade or slot configuration type which are part of a manufacturer's line of wiring devices including receptacles. Other similar devices are covered under Attachment Plugs (AXGV2).

Attachment Plug — A male contact device for the temporary connection of a flexible cord or cable to a receptacle, cord connector, or other female outlet device.

Cord Connector — A female contact device to be wired on flexible cord for use as an extension from an outlet to make a detachable electrical connection to an attachment plug or as an appliance coupler, to a male inlet.

Male Inlet (Equipment Inlet, Motor Attachment Plug) — A male contact device to be mounted on utilization equipment to provide a detachable electrical connection to an appliance coupler or cord connector.

These devices may or may not incorporate fuses, circuit breakers, supplementary protectors or other equivalent overcurrent protection.

CONDITIONS OF ACCEPTABILITY

Consideration is to be given to the Conditions of Acceptability specified in the individual Recognition Reports when these components are employed in the end-use equipment.

RELATED PRODUCTS

This category does not cover connectors for use within equipment enclosures or which do not serve to connect the equipment directly to a branch circuit. See Connectors for Use in Data, Signal, Control and Power Applications

(ECBT2) for additional information.

REQUIREMENTS

The basic standard used to investigate products in this category is UL 498, "Attachment Plugs and Receptacles."
