

1566/VAG
Kit of XZN® impact sockets for axle shaft screws of VAG Group vehicles

This kit of impact sockets with XZN® M12 profile, available in two different lengths, has been specially designed to make it easier to remove the three screws from the axle shaft - gearbox side - in VAG Group vehicles. This allows the axle shaft to be pulled out, without requiring the accessory parts to be removed.

Sizes included in kit:

- XZN® male impact socket M12 L 77 mm
- XZN® male impact socket M12 L 120 mm
