

# LEH HALOGEN FREE TRUNKING

LEH halogen free trunking offers peace of mind in a wide range of installations including airports, schools and hospitals due to its self extinguishing properties.

- Self-extinguishing properties
- LEH should be specified where low flammability and minimal release of toxic gases in the event of fire are essential
- Typical applications would be in locations where public safety is paramount: such as airports and stations
- RAU-PCAB is suitable for use in temperature applications from -30°C to +90°C and is fully UV stable
- LEH system is complemented by a full range of moulded accessories
