DESCRIPTION

INTELLIGENT MULTIFUNCTIONAL BATTERY CHARGER 12/24V

The multifunction battery charger is the go-to tool for the diagnosis protocols and calculator reprogramming. The device has 4 modes and can be used on every type and size of battery.

Charging mode: The charger's advanced software is optimised to correctly and completely charge a great variety of batteries: lead (Flooded, AGM, EFB, GEL), as well as lithium (LiFePo4) from 20Ah to 1200Ah.

Test mode: The battery charger is capable of testing a vehicle's battery and its starter system. These two tests make it possible to quickly identify any potential problem on a vehicle without any additional equipment.

Diagnosis mode: This mode selects the output voltage to adapt the multifunction battery charger to the vehicle's needs. It can also be used to test and reprogram the vehicle's on-board computers in a safe and stable environment.

Showroom mode: This mode allows you to have all the energy required to keep your vehicle in demonstration mode. This allows the vehicle's lights, electronic systems and auxiliaries to function without damaging or seriously discharging the starter battery. The charger can be hidden away out of sight under the vehicle.

Input voltage: 200-240VAC

Input power: 900W

Maximum charge current: 24V-17.5A / 12V-35A

Frequency: 50/60 Hz

Cable length: 3m

Charging voltage: 12/24V

Lead-acid battery capacitance : 15~1000A

SPECIFIC DATA

Designation	INTELLIGENT MULTIFUNCTIONAL BATTERY CHARGER 12/24V
Sales reference	CHB-35
Weight (kg)	5
Width (mm)	243
Length (mm)	257
Height (mm)	100
Guarantee	M1 SAM Equipment and Machine Guarantee:

Guarantee applied

M1 | SAM Equipment and Machine Guarantee:

Guarantee for a limited period, covering technical tools, devices and machines used under normal conditions. The length is given by the number after the letter M: 1 to 5 years
