

## FEATURES

- Prevents seizure and pick up
- Can be used as a chemically protective film and release agent
- Shelf life of 48 months

## RS PRO Lubricant PTFE 200ml

RS Stock No.: 136-8546

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

### Product Description

The RS PRO 200ml PTFE dry film lubricant is a white, dry-film product for use where mineral oils or silicones are not suitable. It is also suitable for use as an anti-stick and mould release agent or where products of the highest purity are required. This film will not contaminate, migrate or pick up dust and dirt particles. It consists of inert particles of PTFE in a suspension medium, which can replace conventional silicones and mineral oils in extreme environments. It can be used to lubricate a wide variety of sliding mechanisms including plain bearings, gears, slides, cams and valves.

### General Specifications

<b>Package Size</b>	200ml
<b>Lubricant Type</b>	PTFE
<b>Package Type</b>	Aerosol
<b>Appearance</b>	White Translucent Fluid
<b>Minimum Operating Temperature</b>	-200°C
<b>Maximum Operating Temperature</b>	250°C
<b>Food Processing Safe</b>	No
<b>Application</b>	Fasteners, slides and bearings in electrical/electronic and industrial assemblies.

### Approvals

<b>Compliance/Certifications</b>	ANSI/ESD S20.20:2014 and BS EN 61340-5-1:2007
