

FEATURES

- **Sintered Bronze Material:** Provides high strength and resistance to wear, ensuring long-lasting performance.
- **2 in Length:** Suitable for applications requiring compact design without compromising on load capacity.
- **2.25 in Outside Diameter:** Ensures compatibility with a range of housings and supports.
- **1.74 in Shaft Diameter:** Designed to fit standard shaft sizes, facilitating easy integration into existing systems.

RS PRO 2 in Plain Bearing, Sintered Bronze

RS Stock No: 594-752

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

This RS PRO plain bearing is designed for applications requiring smooth, low-friction movement. Made from sintered bronze, it offers excellent durability and performance in various industrial settings. The bearing's primary benefit is its ability to support rotational or sliding motion between machine parts, reducing wear and extending equipment life.

General Specifications

Product Type	Plain Bearing
Shaft Diameter	1.74 in

Mechanical Specifications

Length	2 in
Material	Sintered Bronze
Outside Diameter	2.25 in
