

Datasheet

PVC Coated PA 12m Long Grey Flexible Ducting Reinforced, 76mm Bend Radius , Applications Various

RS Stock number 3400150

Features

Ventilation and Air Conditioning Ducting

A steel spiral helix embedded between two layers of PVC coated polyamide fibre fabric

Lightweight and very flexible, will compress to 10% of its extended length

Good high temperature resistance

Suitable for air conditioning, fume ventilation, light duty dust extraction and air movement.

Can also be used as a flexible connection between grilles, diffuser fans and other air movement units

Self- extinguishing

Note

All data refers to performance at 18°C. Any change in temperature will affect the performance data
