

Micro-Fit* TPA Receptacle, Single and Dual Row

Micro-Fit* TPA Receptacles ensure proper mating and prevent accidental back-outs, with the single-row version delivering a one-piece solution and the double-row a two-piece retainer

Features and Benefits

Terminal position assurance (TPA) with integrated secondary lock	Eliminates terminal back-outs resulting from improper assembly
Compatible with all existing Micro-Fit* 3.0 headers and plugs	Enables customers to implement running change to incorporate the TPA design. Removes the need to change both sides of the interface or to make significant revisions or investments in their applications.
Single-row receptacle incorporates a 1-piece housing and terminal lock design	No secondary pieces, reducing SKUs
Single- and Dual-Row, wire-to-wire and wire-to-board configurations immediately available in multiple circuit sizes	Provides wide-range of design flexibility, and supports rapid implementation
Fully polarized housings	Assures proper mating orientation. Compatible with existing headers and plugs
Utilizes all existing Micro-Fit* 3.0 crimp terminals	Removes the need for additional investments in new application tooling
Fully isolated contacts on each side of the interface	Prevent potential arcing
