System requirements

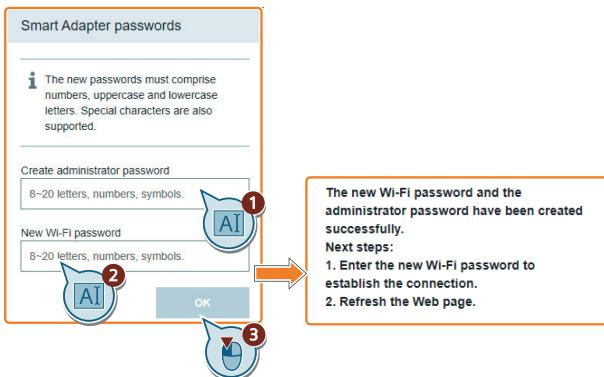

Supported operating systems	Recommended browsers
<ul style="list-style-type: none"> • Windows • ≥ Mac OS 10.15 • ≥ Apple iOS 12.2 • Android 	<ul style="list-style-type: none"> • ≥ Google Chrome 69.0 • ≥ Microsoft Edge 80.0 • ≥ Opera 56.0

Establishing initial wireless network connection

1. Connect the Smart Adapter to the X127 interface of the supported drive.
2. Activate the Wi-Fi interface inside your PC or mobile device. Make sure that you have enabled the automatic IP settings.
3. Search the wireless SSID of the Smart Adapter: SmartAdapter-xxxxxx. (The “xxxxxx” stands for the last six characters of the Smart Adapter’s MAC address printed on the product label.)
To avoid connecting to unsafe Wi-Fi networks that have the same SSID as your Smart Adapter has, check the properties of the Wi-Fi network and make sure that its MAC address is consistent with the MAC address printed on the product label.
4. Enter the wireless network password to launch the connection (default password: 12345678).
Make sure that the Wi-Fi network of the Smart Adapter is the only network your PC or mobile device connects to; otherwise, the Web server of either the Smart Adapter or the drive may not be accessed via domain names.
5. In a supported browser, enter the Web site (<http://smartadapter.net>).
6. Set the new Wi-Fi and administrator passwords in the pop-up window. The Smart Adapter will restart automatically.
7. Reconnect the wireless network using the new Wi-Fi password.

Note:

To achieve better network security, enter a password of 8 to 20 characters that contains numbers, lowercase and uppercase letters, and special symbols (_, -, ~, !, @, #, \$, %, ^, &, and *).

Accessing the drive's Web server

After you have established wireless network connection between the Smart Adapter and your PC or mobile device, access the Web server integrated in the connected drive with one of the following two methods:

- Enter the Web site (<https://simatics.net>) in a supported browser.
- Enter the Web site (<http://smartadapter.net>) and then click "Drive" on the home page of the Smart Adapter.

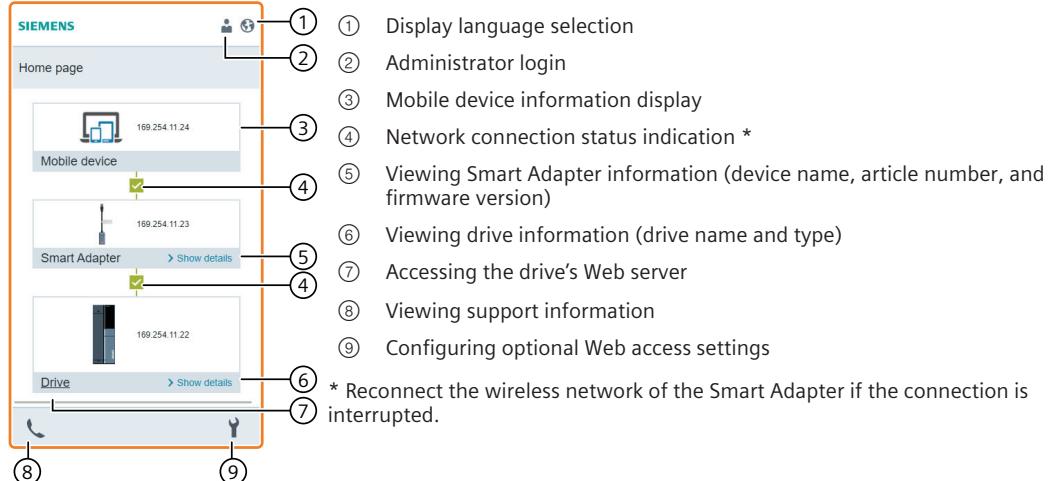

If you are unable to access the Web server or the Wi-Fi connection between your device and the Smart Adapter is unstable, change the IP address of the drive and make sure that the IP address does not fall into the range from 169.254.0.0 to 169.254.255.255.

For more information about the connected drive, refer to the relevant Operating Instructions.
