

Endress+Hauser Digital measuring cable CYK10-A101

CYK10 measuring cable is used with all sensors with Memosens plug-in head. Forget about moisture and benefit from completely safe signal transmission.

Picture for reference only. Product appearance may vary based on configuration

CYK10 guarantees absolute water-proof connection of Memosens sensors to the transmitter. Its inductive coupling shows no contact corrosion and guarantees galvanic isolation of transmitter and medium. Simply forget about limited cable length, interfering potentials or moisture and benefit from completely safe and reliable signal transmission.

- Memosens data cable for all sensors with Memosens plug-in head
- Maximum process safety via non-contact, inductive and digital signal transmission
- No contact corrosion, absolutely watertight, no interference potential
- Increased availability of the measuring point: Digital data transmission provides an automatic error message if the signal is lost

Configuration of CYK10-A101:

Approval:	A	Non-hazardous area
Cable Length:	10	10m
Cable Connection:	1	Wire terminals

Alternative part number: CYK10-A101
