

METTEC 19" RACK CASES

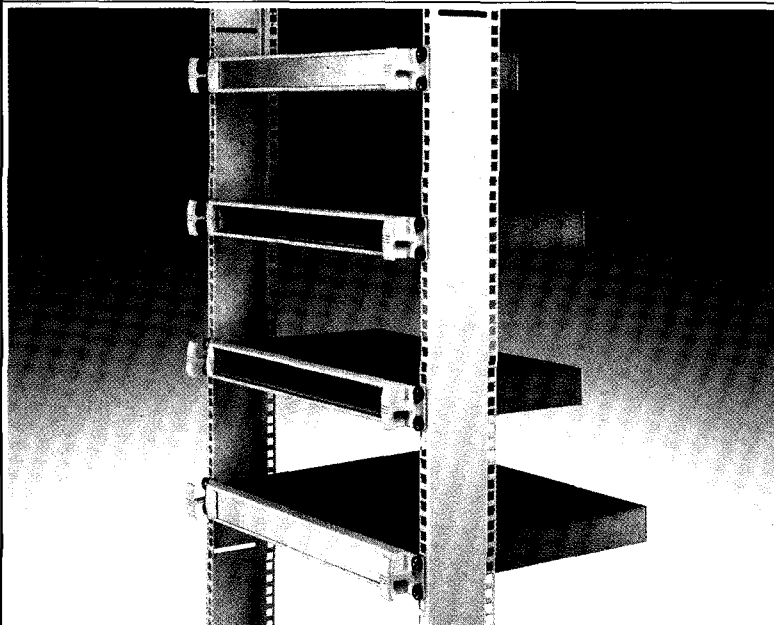

1U – VERSION A

For rack mounting only; the front bezel is painted in light grey, RAL 7035 to match popular 19" racks and the rest of the case is coated in Alocrom 1200 for good EMC shielding and corrosion resistance.

ASSEMBLY

Strong and secure construction in aluminium assembled by four M4 screws. For high shielding attenuation all components are masked and interlock with each other. The top and base panels have EMC contact points on each edge for secure connection. The front panel mounting face is also masked for electrical contact. The base panels are fitted with an M4 earth stud.

All cases are supplied assembled and include the fixings for the accessory front panel kits.

ACCESSORIES

FRONT PANEL KIT:

Recessed for easy assembly of membrane keyboards (see page 38).

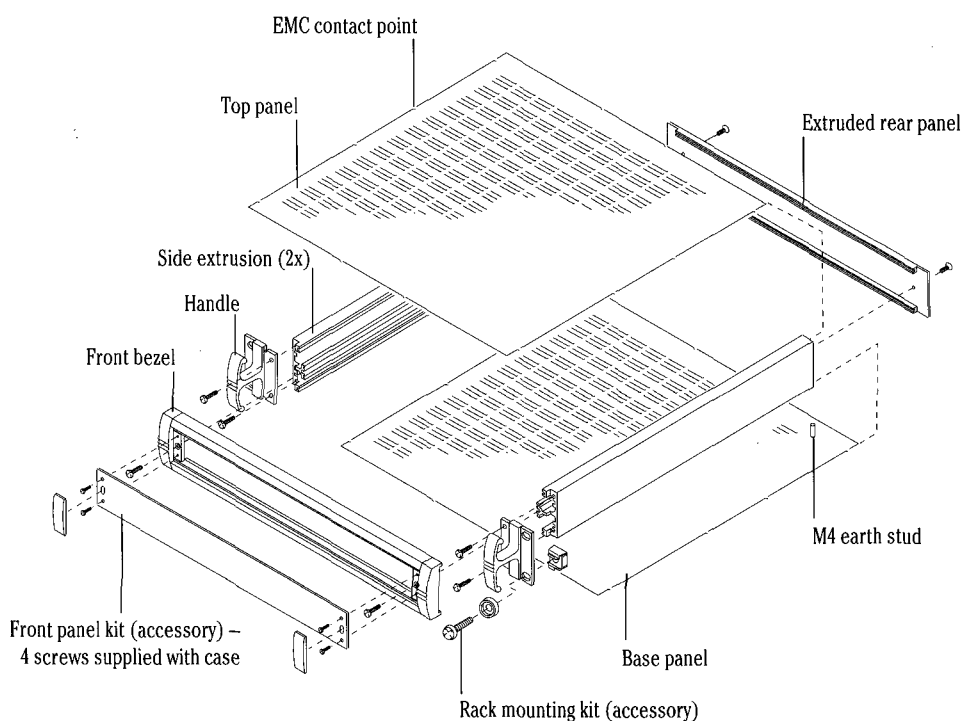

RACK MOUNTING KIT:

All screws and fixings for fitting the case to a rack.

CHASSIS TRAYS:

For mounting PCBs, subassemblies and heavy components (see page 38).
