TEST SEALS

The ABUS 83CS/70 is a premium high security padlock and is built to secure assets of the greatest value. It has a shackle and lock body manufactured from hardened special steel with a patented Nano Protect™ coating that makes it highly resistant to harsh conditions.

This padlock is designed to protect high security sites, assets and goods, largely in the critical national infrastructure markets.

The design of this padlock is suited to securing containers, outbuildings and roller shutters. Insurers often advise commercial clients in certain environments to use a closed shackle to make it harder for the shackle to be removed.

The padlock is supplied to the end-user with an ABUS patented, registered, high security cylinder and key system.

TECHNOLOGY AND FEATURES

- EN12320 CEN Grade 6
- Lock body and shackle made of hardened special steel
- Hardened special steel shackle with NANO PROTECT™ coating for very high corrosion protection
- Cylinder protected against drilling, bumping, pulling open
- Double bolted locking mechanism increases the security of the lock
- Cylinder protection cap against moisture and dust optionally available
- Shackle Type: Closed

Width	70 mm
Height	122 mm
Thickness	30 mm
Shackle Diameter	15 mm
Vertical shackle clearance	32 mm
Horizontal shackle clearance	28.5 mm
