

Energy Generation Kit Flex Rise One

500065 • 6/2015

These solar kits include all components for reliable energy supply either for mobile use or for fixed installations etc. They are ideal for battery charging for camping, caravanning or on boats and for the charging of USB-applications. The kits include the semi-flexible, light-weight Phaesun Semi Flex Solar Modules, a high quality charge controller and easy-to-install- connection cables. The fully weather resistant Semi Flex modules are designed for the use in the harshest environments. They are weather-resistant and can be even used in salt-water environments. The back contact cells bring highest efficiency. They combine a high charging voltage at high temperatures and an efficient charging capacity. The charge controller brings best power control. It has an integrated USB connector where MP3 player, tablet computer, smart phones and other USB loads can be directly charged.

Features

- Fully weather resistant solar modules with a long durability, salt water protected
- High efficient back contact cells
- USB appliance charging
- Solar cable with standard 4 connectors
- Ideal for deck tops, caravan roofs and camper vans
- 2 year panel warranty and 20 year cell performance warranty

Amount	Components
1	Semi-flexible solar module 20W
1	Charge controller 10 A with USB outlet
1	QuickICab4-2,5/5
1	Battery cable with 15 A fuse
Art.No. 500065
