## FRB 14/215

### Locating (stabilizing) ring

A bearing in the locating position must be secured axially in the housing. If the bearing seat in the housing and the bearing width do not match, locating (stabilizing) rings are required. Typically, two locating rings are required per housing. One ring should be placed on each side of the bearing. If only one locating ring is required, it should be installed on the same side as the lock nut.

## Overview

### Dimensions

---

Outside diameter	215 mm
Inside diameter	202 mm
Width	14 mm

### Properties

---

Accessory type	Locating ring
----------------	---------------

### Logistics

---

Product net weight	0.29 kg
eClass code	23-05-17-90
UNSPSC code	31171519
